Registration Statement on Form 10 filed June 22, 2022

Development of a Therapy for the Treatment of ALS  
PMN267, page 14

1. Please revise your description of the PMN267 transgenic mouse model to eliminate the term "encouraging." You may describe the referenced model and present the objective results that lead you to conclude that the results are encouraging. Please also revise your description of the in vitro studies performed in collaboration with Dr. Gene Yeo at University of California San Diego to provided more detailed and quantified information relating to the misfolded TDP-43 reduction.

We remind you that the company and its management are responsible for the accuracy and adequacy of their disclosures, notwithstanding any review, comments, action or absence of action by the staff.
